Cobham SATCOM SwiftBroadband Type Approved by Inmarsat

CAPE TOWN, South Africa – Cobham SATCOM, the leading manufacturer of Inmarsat satellite communications equipment, announced that it received full Inmarsat Type Approval for all Inmarsat SBB services.

The Cobham SATCOM SwiftBroadband product range facilitates connectivity on aircraft, enabling networks, internet access, email, fax and telephony. The compact and modular products allow configuration options to fit every size aircraft.

“We thank Inmarsat for their excellent support and cooperation in achieving this milestone,” said Pete Raby, vice president of Cobham SATCOM.

Cobham SATCOM also produces an extensive range of market leading antennas (comprising of the HGA-8000/7001/7000/6500/6000 and IGA-5001/5006) and sets new standards in drag reduction, weight, compactness and power requirements for aircraft connectivity systems.

About Cobham:

Cobham's products and services have been at the heart of sophisticated military and civil systems for 75 years, keeping people safe, improving communications, and enhancing the capability of land, sea, air and space platforms. The Company has four divisions employing more than 12,000 people on five continents, with customers and partners in over 100 countries and annual revenue of more than £1.4bn / \$2.1 billion.

Cobham SATCOM has been a market leader for more than 30 years, supplying satellite tracking antennas and communications systems for military and civil applications. Airborne products include complete Inmarsat systems and a range of steerable and phased array antennas used by military and commercial customers on commercial aircraft, business jets, helicopters and military platforms in high speed data and voice applications.
