

The most important thing we build is trust

- **APR-39**
Supplying antennas and receivers for light weight RWR for helicopters and light fixed wing applications
- **ALR-67**
Supplying antennas and receivers for leading edge flaps antennas and quadrant receivers on the front line F/A-18 fighter
- **ALQ-211**
Supplying antennas and receivers for advanced antennas and quadrant receivers for special forces applications

Electronic Surveillance

Cobham Sensor Systems, Lansdale

COBHAM

The most important thing we build is trust

Cobham Sensor Systems in Lansdale, PA is a leading supplier of electronic defense components, systems and subsystems. We employ just over 430 highly skilled personnel in our state-of-the-art facility in Lansdale, Pennsylvania, approximately 25 miles north of Philadelphia. The company, a strategic business unit of Cobham Defense Systems, has been operating from the same location for nearly fifty years. We proudly design and manufacture complex countermeasure and radar warning receiver subsystems, as well as sophisticated antenna products and microwave integrated circuit components.

With three customer facing lines of business, Lansdale provides cutting edge technology and advanced manufacturing techniques to support Electronic Attack, Electronic Surveillance, and Standard Antenna products.

As part of the Cobham family, we join over 12,500 people on five continents, with customers and partners in more than 100 countries and annual revenues over \$2bn, reflecting a corporate vision to be the most trusted global partner for leading aerospace and defense technologies.

RF Subsystem Integration meeting stringent performance requirements

Cobham Sensor Systems Lansdale offers solutions from Antennas and RF Components through complex ES and RWR subsystems for a range of defense applications. Our expertise covers the RF spectrum, from DC through 100 GHz, and we specialize in developing broadband solutions where reduced size, weight, and power consumption are critical. Cobham Sensor Systems Lansdale's integrated manufacturing capabilities enable us to quickly turn design concepts into reality, drastically reducing the time to market for new products. We specialize in developing integrated products and subsystems that provide best-value solutions to our customer's most challenging technical problems.
