Cobham's Sea Tel ® ships ST24 TV-at-Sea System for commercial sale

CONCORD, Calif. – Cobham SATCOM is pleased to announce its new Sea Tel ST24 marine stabilized TV receive-only system for the yacht and boating market. With a greater elevation range than most standard 2-axis marine stabilized antennas, the ST24 enables watching TV at higher latitudes, and the one-touch screen graphical antenna control panel (GACP) is easy to work with.

"The ST24 is designed for ease of use and simple installation. The key guiding principles we followed were to truly revolutionize the yacht owner's experience with the Sea Tel Antenna Controller," said John DeSana, vice president of Cobham SATCOM. "Simple, icon-driven, single-touch settings that enable the antenna to rapidly acquire satellite signal even at higher latitudes is what our dealers asked us for, and that is what we are launching today."

The ST24 is a 61 cm (24 in) antenna that is HD ready for Ku-Band digital broadcasting systems. It eliminates the need for complex system interconnect cables required to install and operate other systems on the market. Other features include both manual and automatic skew control. The automatic skew control allows the antenna to operate at optimal skew angle to receive a satellite signal at maximum strength. The high performance stabilization and satellite tracking eliminate the need for expensive upgrades when mounted on a tuna tower, providing significant cost savings over competitive products.

Sea Tel will display its new ST24 TV at sea system at the Miami International Boat Show (Booth I85) February 17 – 21, 2011.

About Cobham SATCOM

Cobham SATCOM is a leader in mobile satellite communications technology and interoperability solutions for commercial and governmental mobile broadband satellite communications. The core expertise of the business is in automated satellite acquisition and tracking equipment, in all bands across the frequency spectrum. The antennas and communications services are used for military and governmental agencies such as homeland security and law enforcement to provide secure, reliable and efficient communications.

About Cobham

Cobham's products and services have been at the heart of sophisticated military and civil systems for more than 75 years, keeping people safe, improving communications, and enhancing the capability of land, sea, air and space platforms. The Company has four divisions employing more than 11,000 people on five continents, with customers and partners in over 100 countries and annual revenue of some £1.9bn / US\$3 billion.
