

# DTC ArmorNet™ Digital Video PTZ Camera & TX

# COBHAM

Model - Pd-PP-D-XX

The most important thing we build is trust

## Palladium Digital Video TX & Camera

DTC has incorporated the latest digital video transmitter technology along with a top quality SONY camera and wireless PTZ control to create the ArmorNet Camera Video Transmitter system.

Self-contained and portable, these units can be installed virtually anywhere for overt surveillance of targeted areas.

The units feature the DTC Palladium COFDM transmitter, with eight programmable channels and AES 128-bit encryption, to prevent unauthorized signal interception by third parties. To-

gether with the SONY 18x optical zoom camera, the unit delivers consistent, high-quality video, particularly in dense urban environments where multipath interference can be a challenge for analog systems. Use the ArmorNet Command Center briefcase or ArmorNet-4™ portable PTZ controller to wirelessly control up to eight of these camera-transmitters.

While the ArmorNet is designed for rapid installation during major events, it can also be permanently installed for constant surveillance.

## Features:

- Single man lift system, 22 lbs
- Designed for rapid installation in just minutes
- Variety of mounting options
- Protective Composite Dome
- Supports both NTSC & PAL formats
- Colinear Transmitter Antenna
- Whip Control Receiver Antenna
- Eight Programmable Channels
- Programmable Output Frequency

## Specifications:

Dimensions	12" x 17" x 20"
Weight	22 lbs
Operating Temperature Range	-10 degrees C to +70 degrees C
Case Temperature	Could exceed operating temp by 30 degrees C
Input Voltage	110 / 220 VAC Auto-Sensing
Power Consumption	~ 55 W
PC Control Interface	RS-232.
Compression Standard	MPEG-2
Line Standard	PAL 625 or NTSC 525
Operating Frequency	L 1710-1850 MHz S2 2200-2300 MHz S 2350-2500 MHz C 4400-5000 MHz (Pd2)
Horizontal Resolution	704, 528, 480, 352 pixels
