

Model - Pd-DVY-95-TX

The most important thing we build is trust

### Palladium Digital Video Transmitter Kit

Palladium DVY kits combine high performance with ease of use for the best video “grab and go” transmission kit available. They are unique on the market, incorporating many components designed and manufactured by Cobham Surveillance, DTC Products. These components include Cobham Surveillance Palladium series of user programmable COFDM digital video transmitters, linear antennas, and RCT/RCR-2 remote switches.

All system components are housed in die cut foam. Two layers of foam nest inside a rugged Underwater Kinetics case. Complete operating

instructions and a wiring diagram are laminated in the lid.

Cobham Surveillance knows how difficult it is to properly connect a covert video system in the field. To make sure your mission is a success we’ve used Molex MicroFit™ locking connectors and color coded each connection throughout. No more mis-connects, and no more connectors pulling loose or becoming intermittent.)

### Features:

- DTC 8 channel, user programmable Palladium digital video transmitter, 100 mW, 250 mW, or 1W
- Dipole omni antennas
- 2 DTC surveillance microphone
- High quality low light B/W camera
- High quality color camera
- Color board camera with 3.7 mm pinhole lens, .1 Lux minimum
- 6-60 mm variable focus wide angle lens
- AES-128 encryption, AES 256 optional

### Specifications:

Transmitter	Choice of DTC Pd-TX-100,250, or 1000 series transmitters with eight user programmable channels
Trnasmitter Antenna	ANT-A-2 Antennas ANT-9 Antenna
Cameras	High quality low light B/W camera High quality color camera B/W board camera with 3.7mm lens, .03 lux Color board camera with 3.7mm lens, .1 lux
Lenses	6-60 mm variable auto iris focus lens 4-20 mm zoom pin hole lens
Tripod	Mini, collapsible tripod
