

SOLO – OEM and Bespoke Applications

COFDM – Video, Audio Telemetry and IP Products

COBHAM

June 2011 Data Sheet

The most important thing we build is trust

OEM applications

OEM applications

Cobham Surveillance can offer a range of PCB level product opportunities with domo technology at their core, for OEM applications. Standard designs such as those used in its range of SOLO2 and SOLO4 products can be offered, or unique design work can be undertaken which allows bespoke requirements for interfaces, power supply arrangements and form factor to be met.

Collaborative development programmes with customers can be undertaken to fulfil specific needs in the RF designs. The Cobham Surveillance team have developed video solutions for UGV and UAV applications.

A dedicated website specifically for our OEM customers is available. Please talk to your Cobham Surveillance account manager for information.

Bespoke Applications

Bespoke applications

Bespoke products can also be offered to ensure optimal integration between standard technology building blocks.

Typical Cobham Surveillance bespoke applications:

- Installation of a central receiver and integration into wired systems
Installation of Cobham systems into special enclosures such as suitcases
- Site surveys and advice on installation of fixed infrastructure systems
- Applying the technology into new scenarios and environments
- Special testing, waterproofing and rugged enclosures
- Point to point wireless IP link equipment
- Relays and custom control solution for aircraft fitment
Rebroadcast units to bring back video and audio TX from difficult environments.
