

Lightning Testing and Consultancy

COBHAM

Cobham Technical Services

The most important thing we build is trust

Lightning Testing and Consultancy

Cobham Technical Services

- Comprehensive lightning testing services, consultancy and R&D for aerospace and ground-based infrastructure and systems
- Extensively equipped lightning testing simulation laboratory, based in Abingdon (UK)

Protecting critical infrastructure and systems

Cobham Technical Services (Abingdon) provides comprehensive lightning testing services, consultancy and R&D for aerospace and ground-based infrastructure and systems.

- In-depth knowledge of the direct and indirect effects of lightning strikes.
- Wide range of testing services at an extensively equipped lightning simulation laboratory in Abingdon (UK). Mobile equipment also available for off-site testing at customer premises.
- Consultancy on all stages of aircraft lightning protection design and certification, through review, testing and analysis.
- Computer simulation and modelling of indirect lightning effects in complex structures and installations, including aircraft and wind-turbine systems.
- Advanced in-house training courses on aircraft lightning protection as well as tailored short courses at customer premises.
