**Cobham Selected by MIL-SAT Communications for US Navy Satellite
Communications Contract**

CONCORD, California— MIL-SAT Communications, a long time distributor of Cobham's Sea Tel satellite terminal range, has selected the Sea Tel 2.4 meter 9797B marine stabilized satellite communication terminals to fulfil a recently-awarded US Navy contract. More than 2,000 similar Sea Tel products have been shipped to customers worldwide from Cobham Antenna Systems, in Concord.

The \$11.9 million firm-fixed price, indefinite-delivery/indefinite-quantity (IDIQ) contract awarded to MIL-SAT by the US Navy requires a supply of Sea Tel antenna systems for the Force Training Assessment Department at the Naval Surface Warfare Center, Corona Division. This contract's value to Cobham is not being disclosed.

"We look forward to supplying these highly reliable 9797B VSAT antenna systems to the Navy for their fleet training programs," said Fred Cahill, Vice President of Cobham Antenna Systems.

"MIL-SAT would like to thank the US Navy for selecting us," said Lynn Oldham, Director of Operations of MIL-SAT. "We look forward to providing them with Cobham's industry leading Sea Tel 9797B systems over the next several years."

Sea Tel products will be assembled at and shipped from Concord, California to MIL-SAT in Surrey, Virginia, for final integration, and the work performed under this contract and is expected to be completed by September 2016.

About MIL-SAT Global Communications

MIL-SAT, LLC., incorporated in Virginia, was established in 2004 as a satellite systems hardware and airtime wholesale brokerage company. MIL-SAT is a small, woman owned business located in Surry, Virginia. MIL-SAT is a Hardware Distributor and System Integrator providing satellite systems for maritime vessels, aeronautical and terrestrial

applications. MIL-SAT provisions and installs hardware from leading satellite equipment manufacturers on a global basis. MIL-SAT also provisions, installs and custom designs satellite network services.

About Cobham

Cobham specializes in meeting the insatiable demand for data, connectivity and bandwidth in defense, security and commercial environments. Offering a technically diverse and innovative range of technologies and services, the Group protects lives and livelihoods, responding to customer needs with agility that differentiates it. The most important thing we build is trust. Employing 10,000 people on five continents, the Group has customers and partners in over 100 countries.

Cobham Antenna Systems

For more than 60 years, Cobham Antenna Systems has been a world leader in the design and manufacture of communication systems and antennas. Cobham’s innovative communication, navigation, jamming, electronic warfare, telemetry and radar antennas serve all major commercial aviation manufacturers and operators, major defense contractors, emergency response organizations and law enforcement agencies. Cobham’s satellite communications systems connect military and commercial aircraft, vessels, vehicles and mobile teams with the world, through high-speed data, voice and video. Cobham Antenna Systems also produces high performance composite products for the aerospace industry, including radomes and components for military aircraft, ships and vehicles.
