Cobham Digital Audio Control System (DACS) Receives FAA's TSO Certification

PRESCOTT, Arizona - Cobham's Digital Audio Control System (DACS) has received Technical Standards Order (TSO) certification from the US Federal Aviation Administration, a major milestone that approves the manufacture of DACS for installation on certified aircraft. This is in addition to achieving European Technical Standards Order (ETSO) in September of this year.

With installations completed and certified by both Original Equipment Manufacturers (OEM's) and completion centers, DACS has been flying worldwide for two years and is proven in nearly 100 installations across a number of airframe types, including the Eurocopter EC135, Fokker F27, and AgustaWestland A109S.

Feedback regarding DACS consistently praises the system's simplified installation, superior performance in high noise environments, and configurability for special mission and tactical operations.
